SSI Managed Care External Advocacy Project

Helping you manage your managed care

What is the SSI Managed Care Program?

The SSI Managed Care Program is a Medicaid Program that provides health care services for those who receive SSI and Medicaid or who receive SSI-related Medicaid because of being blind, disabled or elderly. These health care services are offered by various Managed Care Organizations (MCOs). Most, but not all, people will have to join an MCO.

What is the SSI Managed Care External Advocacy Project?

The SSI Managed Care External Advocacy Project provides answers for people who have questions about the SSI Managed Care Program and provides advocacy services to people enrolled in the SSI Managed Care Program who are having problems.

What the SSI Managed Care External Advocate can do for you:

- Help you understand the enrollment process.
- Explain your rights and responsibilities as a member of a Managed Care Organization (MCO).
- Make sure you continue to get the care you need, from your same health care providers, for the first two months (at least) of enrollment in the MCO.
- Help you get answers to questions about your Managed Care Organization (MCO) and health care.
- Help you get the specialty care or medical equipment you need.
- Help you get mental health or AODA treatment if you need it.
- If your care is ever delayed, denied, limited or ended, help you understand why.
- Help you appeal these decisions.
